DETAILED ACTION

1. This Office action is in response to Applicant's RCE, filed on 12/16/2004.

2. Claims 1-25 are pending.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1, 3, 6, 9, 10, 11, 12, 15, 16, 17, 18, 19 and 20-25 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Yamauchi et al. (U.S. Pat. No. 5,613,109) and Min (U.S. Pat. No. 5,175,716) in view of De Pommery et al. (U.S. Pat. No. 4,450,535) in view of Chigira (U.S. Pat. No. 5,163,356).

As per claims 1, 3, 6, 9, 10, 11, 12, 15, 16, 17, 18, 19 and 20-25 Yamauchi substantially discloses a data reproduction that comprises a storage unit for storing element data or namely a CD-ROM (which is seen to read to read as Applicant's claimed invention wherein it is stated that a period reader reading an effective period stored on an individual self contained computer readable content medium, the content medium indicating the requestable period of time during which a content on the content medium can be served and sold);

Art Unit: 3621

a comparator for judging data (see., abstract, col 3, lines 5-30). It is to be noted that Yamauchi fails to disclose that the judging data (or comparator or generator) is for judging present time that falls within the <u>requestable</u> period time.

However, Min discloses a comparator for comparing the numbers of the tracks based on the a first time period and second time period [or effective time period] (see., col 4, lines 22-40, col 5, lines 11-30). Accordingly, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the reproduction data of Yamauchi by including the limitations detailed above as taught by Min because such modification would detect the number of tracks (or store data) moved.

Yamauchi and Min fail to disclose Applicant's newly added limitations wherein said a key to unlock content stored thereon. De Pommery discloses a method/system for distribution of articles or services, wherein a LOCKF area for validating the content of the creation memory and a key for protecting reading operations or lock or unlock content (see., col 6, lines 42-55, col 14, lines 56-68, col 15, lines 1-52, figs 6, 17, and 16). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the teachings of Yamauchi and Min by including the locking content of de Pommery because such modification would provide prevent access to the medium.

Yamauchi, Min, and De Pommery fail to disclose Applicant's newly added limitation wherein said calendar sales. Chigira discloses a prediction for future sale based on a calendar information and a record of sale stored in a first memory (see., abstract, col 6, lines 10-40. It would have been obvious to a person of ordinary skill in the art at the time

Art Unit: 3621

the invention was made to modify the teachings of Yamauchi, Min, and Pommery by including the limitation indicated above as taught by Chigira because this would determine future sale based on the calendar record of sale.

5. Claims 2, 4, 5, 7, 8, 13 and 14 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Yamauchi et al. (U.S. Pat. No. 5,613,109) in view of Min (U.S. Pat. No. 5,175,716), De Pommery et al. (U.S. Pat. No. 4,450,535) and further in view of Chigira.

As per claims 2, 4, 5, 7, 8, 13 and 14 Yamauchi substantially discloses a data reproduction that comprises a storage unit for storing element data or namely a CD-ROM (which is equivalent to Applicant's claimed invention wherein it is stated that a period reader reading a period stored on an individual self contained computer readable content medium, the content medium indicating a period of time during which a content on the content medium can be served and sold);

a comparator for judging data (see., abstract, col 3, lines 5-30). It is to be noted that Yamauchi fails to disclose that the judging data (or comparator or generator) is for judging present time that falls within the requestable period time.

However, **Min** discloses a comparator for comparing the numbers of the tracks based on the a first time period and second time period [or effective time period] (see., col 4, lines 22-40, col 5, lines 11-30). Accordingly, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the reproduction

Application/Control Number: 08/645,073

Art Unit: 3621

data of Yamauchi by including the limitations detailed above as taught by Min because such modification would detect the number of tracks (or store data) moved.

Page 5

Yamauchi and Min fail to disclose a locked content for locking area of the medium.

However, De Pommery discloses a method/system for distribution of articles or services, wherein a LOCKF area for validating the content of the creation memory and a key for protecting reading operations or lock or unlock content (see., col 6, lines 42-55, col 14, lines 56-68, col 15, lines 1-52, figs 6, 17, and 16). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the teachings of Yamauchi and Min by including the locking content of de Pommery because such modification would provide prevent access to the medium. Yamauchi, Min, and De Pommery fail to disclose this limitation wherein said calendar sales. Chigira discloses a prediction for future sale based on a calendar information and a record of sale stored in a first memory (see., abstract, col 6, lines 10-40). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the teachings of Yamauchi, Min, and Pommery by including the limitation indicated above as taught by Chigira because this would determine future sale based on the calendar record of sale.

REMARKS

6. In response to Applicant's arguments, Applicant argues that the prior art of record taken alone or in combination fail to anticipate or render obvious the recited feature:

Art Unit: 3621

a. "content medium that can be served <u>and sold</u>". However, the examiner respectfully disagrees since an object or item that can be served, can also be sold.

b. Applicant also maintains that Yamauchi, Min, and DePommery cannot be combined, the Examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071,5 USPQ2d 1596 (Fed. Cir. 1988) and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

The rationale to modify or combine the prior art does not have to be expressly stated in the prior art; the rationale may be expressly or impliedly contained in the prior art or it may be reasoned from knowledge generally available to one of ordinary skill in the art, established scientific principles, or legal precedent established by prior case law. In re Fine, 837 F.2d 1071, 5USPQ2d 1596 (Fed. Cir. 1988); In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). See also In re Eli Lilli & Co., 902 F.2d 943, 14 USPQ2d 1741 (Fed. Cir. 1990) (discussion of reliance on legal precedent); In re Nilssen, 851 F.2d 1401, 7USPQ2d 1500 (Fed. Cir. 1988) (references do not have to explicitly suggest combining teachings); Ex parte Clapp, 227 USPQ 972 (Bd. Pat. App & Inter); and Es parte Levengood, 28 USPQ2d 1300 (Bd. Pat. App. & Inter. 1993) (reliance on logic and sound scientific reasoning).

Application/Control Number: 08/645,073

Art Unit: 3621

Also in reference to Ex parte Levengood, 28 USPQ2d, 1301, the court stated that

Page 7

"Obviousness is a legal conclusion, the determination of which is a question of patent

law.

Motivation for combining the teachings of the various references need not to explicitly

found in the reference themselves, In re Keller, 642 F.2d 413, 208USPQ 871 (CCPA

1981). Indeed, the Examiner may provide an explanation based on logic and sound

scientific reasoning that will support a holding of obviousness. In re Soli, 317 F.2d 941

137 USPQ 797 (CCPA 1963)."

c. "the automatic food vending machine of Chigira does not teach a requestable

calender sales period of time stored on an individual self container computer". As

indicated above, it is believed that Yamauchi, Min, and De Pommery fail to disclose this

limitation wherein said calendar sales. Chigira discloses a prediction for future sale

based on a calendar information and a record of sale stored in a first memory (see.,

abstract, col 6, lines 10-40). Accordingly, it would have been obvious to a person of

ordinary skill in the art at the time the invention was made to modify the teachings of

Yamauchi, Min, and Pommery by including the limitation indicated above as taught by

Chigira because this would determine future sale based on the calendar record of sale.

Conclusion

7. Any inquiry concerning this communication or earlier communications from

the examiner should be directed to Pierre E. Elisca whose telephone number is 703

305-3987. The examiner can normally be reached on 6:30 to 5:00.

Application/Control Number: 08/645,073 Page 8

Art Unit: 3621

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 703 305-9769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
